

MOBRA Information Poster

A computational verification prototype for mobile-laboratory biosecurity readiness.

MOBRA practice points

- Use documented context, responsibilities, and review points.
- Connect controls to objective evidence and traceable decisions.
- Keep uncertainty, limitations, and escalation visible.
- Treat outputs as demonstration support, not authorization.

Framework at a glance

60 requirements | 24 hazards

Likelihood x Consequence matrix

BRI + critical-control override

Streamlit

Github

Educational summary. Source basis: WHO guidance, ISO standards, BMBL, and MOBRA methodology notes.

No endorsement is claimed. Demonstration outputs are examples and require qualified institutional review.
